

FARM KING

Pulses • Spices • Peanuts

A New Venture of **KIEH** Group
STEEL... FOR LIFE

Our Product Story

Company Profile

Farmking Food Products Pvt. Ltd. is the maiden venture of KICH GROUP in the Food Industry. The group brings along wide ranging expertise in developing quality products of global standards. It is known for high ethics and customer satisfaction. We have set up fully automatic, state of the art production facility with global standards of hygiene and safety to produce and market food and allied products under the brand name FARMKING. In line with the group motto of providing utmost customer satisfaction we have set up a dedicated team for Effective customer assistance and satisfaction.

Why – 'FARMKING'?

We believe, spices are the cash crops that helps to ease the economic status of custodians of nature – 'Farmers', who truly understand the absolute relationship between the Mankind and Nature. Hence, to celebrate the revered ties we have coined the name "FARMKING" for our organization and range of products to follow.

Our Mission

1. To ensure zero exploitation and wastage of common natural resources in process of being a commercial enterprise. We believe in preserving the Nature. USE ONLY WHAT IS NEEDED.

2. To establish a value addition based chain to benefit our internal and external customers and people associated with us.

Our Vision

“Festive Culinary Delight in every bite” is our motto – An assurance to our customers that would always stand and the test of times. We shall strive for presenting range of food products to enhance the quality of life of our consumers.

Farmking Team

At Farmking, we believe that men come before the material and our team of trained professionals enables us to achieve shared objectives in an effective and efficient way. We provide regular training to our employees so that they ensure the highest standards of Hygiene and Quality. Valuable experience and guidance of our promoters help us in managing our business as they focus on quality, product development and creating and sustaining customers.

Modern Chemical and Microbiological Laboratory

Our In House laboratory is equipped with Latest Microbiological Facilities for testing of related Pathogens that occur naturally in Agricultural produce like spices and pulses. We have rigorous SOPs for testing of Incoming material, Online process testing and Finished goods testing as per Global standards. The Physical and Chemical testing is part of our QUALITY MANUAL.

Sourcing of Raw Material

To source good quality of agricultural produce directly from the place of origin is key to providing good product. We have wide network that enables us to procure directly from the farm lands.

Research and Development Facility

We have dedicated team of professional Food Technologists and technicians along with requisite hardware to pursue our quest for continuous development. We have expertise to develop new recipes, blends and processes, IT serves as NERVE CENTRE for development of Future Ready Products for our Esteemed consumers.

> In House Cold Room

In House Cold Room adds to our strength of providing quality products. It helps in Housing Raw Material at controlled temperature under proper conditions to prevent it from any contamination. The scientific housekeeping procedures involves FIFO and regular quality checks on stored materials.

Certificates

ISO

Farmking has received recognition from ISO (International Organization for Standardization) for maintaining all the requirements for standardization and quality assurance in terms of its management system, manufacturing process, service, or documentation procedure.

Apeda

Farmking has acquired support from the Agricultural & Processed Food Products Export Development Authority (APEDA) which is responsible for the export promotion of agricultural products. Through this Farmking will get the financial assistance, information and guidelines for its exports.

US-FDA

To ensure the safety and quality of the food products, Farmking has received the approval from US-FDA (Food and Drug Administration). Through this Farmking assures the protection of public health through the control and supervision of food safety.

BRCGS

Farmking managed to achieve the recognition from the leading brand and consumer protection organisation BRCGS (Brand Reputation Compliance Global Standards). BRCGS is an organization that has recognized over 29,000 certificated suppliers over 130 countries. This certification is issued through a global network of accredited certification bodies.

Spices Board

In order to make the exports smoothly Farmking has acquired certification from Spices Board of India that comes under the Government Ministry of Commerce and Industry. Through this we can make the worldwide promotion of Indian spices as the Board is an international link between the Indian exporters and the importers abroad.

Sedex

Farmking has managed to receive the Sedex Certification (Supplier Ethical Data Exchange) to ensure the moral and mindful practices of their worldwide supply chains. It is a non-profit organization that helps to maintain ethical information of the organisation in a simple and effective manner.

Applied for Certificates

INDIA'S BEST

**CRYOGENIC
TECHNOLOGY**
upto -196° TEMPRATURE GRINDING

We have the best laid out Cryogenic plant in India. This is GLOBAL NEXT Generation grinding technology under super cooled environment. This ensures that nutrients and the essential oils in the spices are retained. Thus the goodness, aroma and texture of the products are perfectly maintained.

Benefits of Cryogenic Grinding Technology

Preserves Aroma, Flavor and Color

When spices are powdered using 'Cryogenic Grinding Process', it holds the volatile, etheric and oleoresins oils. These are the main compounds offering flavor, aroma and color to any spice mix.

Even Consistency

Through this special grinding process, spices are ground evenly so there are no lumps or residues left.

Small is enough

When the spices are powdered using Cryogenic Technology, they hold their inherent natural taste. So whenever these spice mixes are used while cooking food, one actually needs to add its small quantity to enhance the taste.

Roasting Blending system

Thermal Fluid fired Roasting and blending system – Certain spices emit best aroma and flavor only when they are grinded after requisite roasting/heating.. Chamber capacity – 1200 litre.

Sterilisation

Process

This is a Global Hygiene process, We use the process of sterilization by exposing the product to low temperature process in a Specialized Chamber under specific scientific conditions to eliminate Pathogens, microbes and their spores, that may have been present in the Finished product.

Benefits of Sterilisation Technology

Free From Pathogens and Microbes

The process results in destroying most viruses, bacteria, and fungi including bacterial spores. It also eliminates known microbiological organisms that can cause critical health conditions in humans.

The higher expectancy of spices

Adoption of authentic and effective sterilization process is very crucial to store spices for longer duration. It enhances the shelf life of the product.

Technology & Innovation

Famrking is a technology driven enterprise that operates some of the best machines in the industry. Farmking strives to be Quality centric organization with customer focus, It makes us integrate the human needs to their solutions through technological advancement.

Sortex Machine

State of the Art Color Sorter (with HD Color Sensor) with Infrared Imaging System & Dust Sucking System) – Exclusive Sorting for Target Sorting, Fitted with 12 Ultra high resolution Cameras of 5400 CCD, 240 mega pixels Confocal lens Provides Gentle Removal and Shape Sorting, Removes all foreign material like Plastics, Stones, Glass etc.) Has Accuracy Rate of 99.99%.

– Fully Automated, Cleaning, Grading and SORTEX units for various Whole Spices, Pulses and Oil Seeds. Four Stage cleaning Machine – with Dust Collector, Classifier, De Stoner, Gravity separator.

Capacity – 100 Tons per day.

Bag in Box Packaging Machines

Fully automatic PLC based bag in box packaging machine. Capacity – 2400 packs per hour.

Vacuum Packing Lines

For the first time in India we shall be packing lentils in Vacuum packs that will enhance the shelf life.

- PLC based fully automatic high speed Vacuum Packing line for Brick / Cube shape Vacuum Pack for longer Shelf Life and Ease of Storage. Capacity 600 packs per hour. Pack sizes 250g to 5 kg.
- State of the Art high speed Multiware packing machine for Whole spices and pulses with 10 heads capable of packing 3000 pouches per hour.
- The packing line is equipped with high sensors metal detectors capable of detecting and removing ferrous and non ferrous particles of even 0.8 mm.

Thus providing material of highest grades of hygiene and purity
